

QlikView

QlikView is the statistical tool for TRACES-NT. As Authority, you can access it and be able to search for data relating to CHED-PPs signed in your Country as well as the Rejected CHED-PPs of the entire EU.

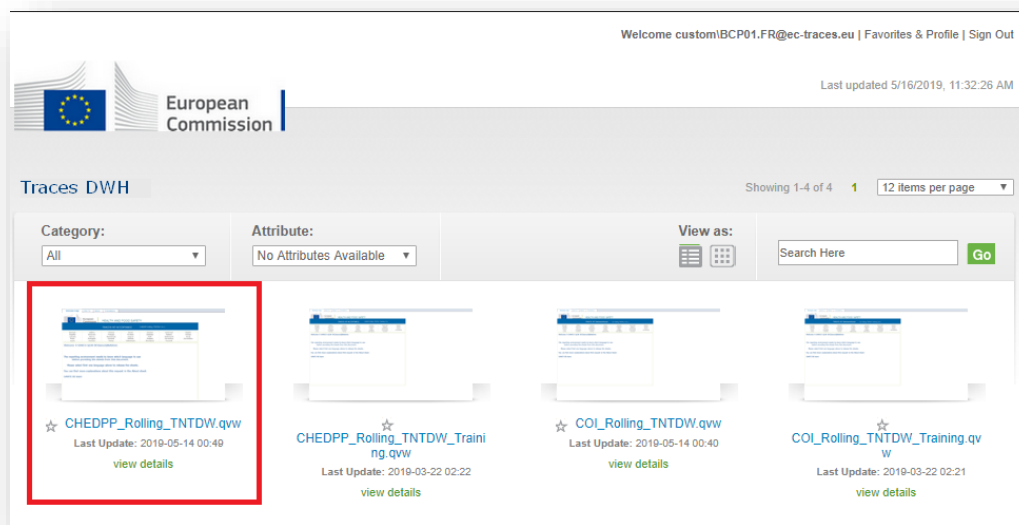

To access QlikView, click on “Analytics” and then on QlikView.

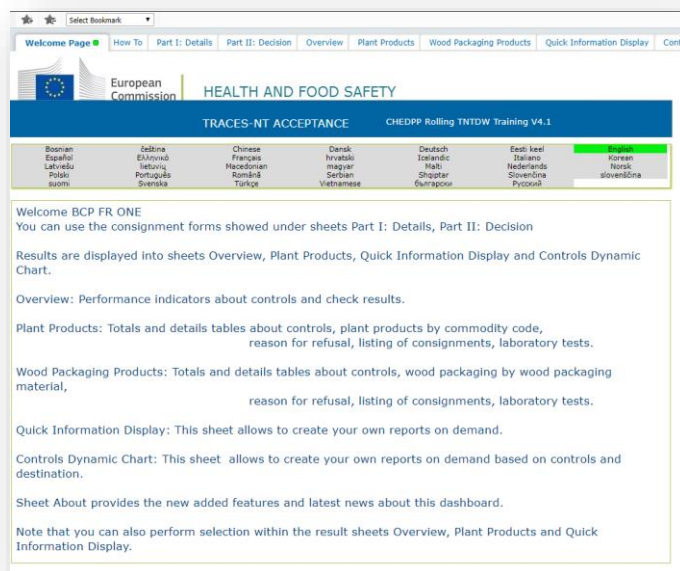

The system will redirect you to a webpage where you will have to click on the small button in the top right corner “Sign in”.

Select which CHED-PP database you want to access (Production Env. as shown in the printscreen or Training Env. if you want to train on the tool).

On the welcome page of QlikView, you will be asked to select a language.

When the language is selected, you will be able to freely navigate in the tabs and customize your research.

Note: In tab “Part I: Details”, you can filter your search by ANY of the fields present in Part I of a CHED-PP

In tab “Part II: Decision” you can filter your search by ANY of the fields present in Part II of a CHED-PP

In the tabs “Overview”, “Plant Products” and “Wood packaging material” some pre-made tables are available.

In the tab “Quick information display”, you can create your own table by selecting the proper filters, the “Available fields” and the “Metrics”.

All the tables made in QlikView can be exported to Excel to be manipulated on convenience.

You can “Bookmark” your searches: the system will save them and when you will need to access those searches again in the future, you will have to click on the star in the upper left corner. By refreshing the page, all the data inside a specific search will be updated, without having to re-do the table from scratch.

Here is an example of customised table to be exported to Excel:

Click on any of the dates item to make it active (green).
